ORDER YOURS TODAY!

This is by far the most significant improvement to the manual since its creation. The 2009 edition of CSIA's *Successful Chimney Sweeping* is made up of 260 full-color pages and is three-hole punched so you have the option to put it in your favorite binder to use as a reference after you have read it cover-to-cover while studying for your CSIA Certified Chimney Sweep® exams. Loads of new information has been added to nearly every chapter. Plus, there is an entirely new chapter on masonry heaters! Hundreds of photos and illustrations have been added to enhance your learning experience.

On September 1, 2009, the CSIA Certified Chimney Sweep program will undergo some BIG changes. The most significant change is to the exam content.

Certification candidates will be required to pass two exams to earn the credential. The first is a one-hour closed-book exam based on the *Successful Chimney Sweeping* manual and the three levels of inspection from the NFPA 211. The second is a one-hour open-book exam based on the International Residential Code.
