

## Accepted Product Benefits

- Acceptance of your product from the #1 organization dedicated to consumer safety in the use of chimney and venting systems.
- Your website linked from [csia.org](http://csia.org)
- Press release and announcements in chimney and trade publications.
- Homeowner and industry professional recognition of your affiliation with CSIA.
- Opportunity for product exposure via CSIA Certified Chimney Sweeps nationwide.
- Use of CSIA Accepted Product logo on product packaging and marketing materials.
- Credibility through third-party acceptance of your product.

Visit the Chimney Safety Institute of America's website — [www.csia.org](http://www.csia.org) — to find a CSIA Certified Chimney Sweep® in your area.

The Chimney Safety Institute of America (CSIA) is a non-profit educational institute that has established the most widely-recognized national certification program for chimney sweeps in the United States. The program was developed in keeping with the CSIA's commitment to the safety and efficiency of chimney and venting systems and to the elimination of residential chimney fires, carbon monoxide intrusion and other chimney and vent-related hazards. CSIA devotes its resources to educating the public, the insurance industry, chimney service professionals and other fire prevention specialists about the prevention and correction of chimney and venting system hazards.

# CSIA Accepted Products™ Program

CSIA is America's #1 Resource for identifying products and services that promote the safe operation of chimney and venting systems in homes across the country.

Through the Accepted Product program, partners with manufacturers to build homeowner awareness of general chimney safety while promoting those companies who inherently value safety and demonstrate that commitment through product quality and innovation.

## Product Eligibility

1. The product must be related to the Hearth, Sweeping, Venting, or Chimney industry.
2. Where applicable, the product must be tested and listed to a nationally recognized performance standard, including, but not limited to applicable standards from organizations such as ANSI, ASTM, UL, CSA.
3. The product should meet nationally recognized standards for product safety. If the product has been subject of a recall and/or public warning, the applicant must provide CSIA with sufficient documentation explaining the nature of the recall and/or warning and the corrective action taken by the manufacturer.

*In accordance with the Chimney Safety Institute of America Product Acceptance Policy, approval granted by CSIA is limited to the specific product submitted and does not apply to all of the manufacturer's products. Manufacturers who wish to have multiple products reviewed by CSIA's Product Acceptance Review Committee must submit one application per individual product.*

## How to Participate

The following documents are required as part of the CSIA Accepted Product application process:

1. Product specifications.
2. Evidence from a testing agency verifying the product has been tested to applicable standards, including a summary of testing methods, the listing agency, and listing and/or file number, if applicable.
3. Documentation of prior recall or warning announcements and a statement of corrective action taken. Or a statement certifying the product is free of recalls or warning announcement history.
4. A copy of all sales and marketing materials relevant to the intended use of the product, including sample product packaging.

Visit [www.csia.org/acceptedproducts](http://www.csia.org/acceptedproducts) for additional details.

Only those products which have been granted CSIA Accepted Product status will be permitted to display the seal below on their packaging.
